

std::exception

```
classDiagram
    class std_exception["std::exception"]
    class uglied_FailedInitGladException["uglid::FailedInitGladException"]
    uglied_FailedInitGladException --|> std_exception
```

The diagram illustrates an inheritance relationship. At the top is a white box representing the `std::exception` class, divided into three horizontal sections. Below it is a grey box representing the `uglid::FailedInitGladException` class, divided into three horizontal sections. A blue arrow with an open triangular head points from the top section of the grey box to the bottom section of the white box, indicating that `uglid::FailedInitGladException` inherits from `std::exception`.

uglid::FailedInitGladException
